Replace the ^{Fourth}~~third~~ fully paragraph of page 16 with the following:

C.M.
3/6/07

In use, the user maintains the grip of the laser and depresses the button 8_11 to activate or deactivate the laser beam. The user is capable of seeing and feeling the taper of surfaces 6 and 7 to determine that fingers are being placed too closely to the laser beam. Accordingly, it is improbable that actuating the laser beam will exposes the gripping fingers or thumb of a user to direct contact with the radioactive laser beam.
